

IMET believes that comprehensive education includes a knowledge and awareness of the medical devices and products necessary to perform the procedures presented at these courses. Several of the technologies discussed in the lecture sessions will be utilized in hands-on lab sessions. The real-life surgical setting of this unique educational experience is made possible, in part, through technology donations from the medical device industry.

These activities may be supported by unrestricted educational grants from commercial sources. Any grants received will be disclosed to the participants according to the ACCME Standards for Commercial Support. All grants are provided with the understanding that the supporter will not exert any influence on the content or educational development of this activity as a condition of the gift; nor will they take, or have taken any role in the selection of topics, speakers, or audience for this activity. These activities are for educational purposes and not for the purpose of promoting any product. Promotional activities will not be allowed in the meeting rooms and these activities will be presented with objectivity and balance.

### ***BENEFITS OF PARTICIPATION IN IMET'S CME ACTIVITIES***

In return for your support of an IMET CME activity, you will receive the following:

- ✓ Acknowledgement of your support through signage at the conference and in the course syllabus.
- ✓ Inclusion of your company logo on upcoming conference announcements and brochures which are distributed to physicians, nurses and other healthcare providers.
- ✓ Inclusion of your company's surgical instruments in the training sessions, offering participants a hands-on, real-time experience using your products.
- ✓ Participation of your representatives in the labs to answer any questions regarding appropriate usage of your products.
- ✓ Participation of your representatives in the lecture sessions, allowing them the opportunity to gain relevant clinical information and learn about the latest medical advances in the treatment of related disease.
- ✓ Listing of your product profile and sales contact information in the Vendor Resources section of the participant course materials, for reference during and after the conference.
- ✓ Tabletop display in the exhibit sessions, which are held in conjunction with meals to encourage physician participation.
- ✓ Roster of conference attendees with detailed contact information to promote interaction during and after the workshop.
